

# **SUPERCUISE**

## **PREMIUM WOVEN POLYESTER**

Contender Sailcloth offers an extensive line of high quality cruising and racing sailcloth to meet any application. These styles are the end result of careful yarn selection, high beat-up woven constructions, and advanced finishing. High tenacity polyester fibers are selected for their strength, stretch resistance, and recovery. These yarns are woven on state-of-the-art heavy duty, shuttle-less looms to assure consistent and defect-free fabrics in the tightest weaves possible.

Consistent with the quality of design, fiber selection, and finish which is seen in the other Contender styles, the SUPERCUISE range of fabrics meets the requirements for high performance cruising sails at an economical price. These styles all feature high tenacity yarns in wide width constructions.

### **SUPERCUISE Advantages:**

- High performance cruising fabrics , offering performance and durability
- High tenacity polyester constructions
- Polyreg finish for reliable performance
